

5 REASONS TO ONLY USE A GENUINE ONEAC/POWERVAR REPLACEMENT BATTERY IN YOUR UPS

UPS batteries wear out over time, leading to loss of power capacity and runtime. The UPS will inevitably need to have its batteries replaced.

SAFETY

Use of non-ONEAC/POWERVAR batteries may cause lower runtimes, damage to the UPS, create a hazardous condition, or void UL, CSA, VDE, and other safety certifications on the UPS.

ENVIRONMENTAL

ONEAC/POWERVAR recycles used batteries and reuses nearly 100% of battery lead content to protect the environment. With each purchase of a genuine ONEAC/POWERVAR replacement battery, you get free freight for proper disposal of your old batteries (currently available in USA only.)

WARRANTY

ONEAC/POWERVAR provides a 1 year warranty on each replacement battery.

USABILITY

ONEAC/POWERVAR supplies customers with proper UPS instructions, along with any necessary wires and connectors.

PROTECT YOUR UPS

Any use of "knock-off" batteries can void your ONEAC/POWERVAR UPS' warranty should issues arise.
